Why It's Important to ALL of Us!

Alcohol and drug abuse hurts our community socially and economically.

Treatment and prevention can work!

Recovering people in our community contribute in positive and significant ways.

Family, friends & community members can help support recovering people:

*Learn the facts of addiction & recovery
*Don't joke about drinking & drug use
*Respect another person's right to not drink
*If you know someone in recovery, tell them you admire their efforts.
